

Congress Program | Thursday 17 May 2012 *continued***3D Neurodegenerative Conditions: Rehabilitation Opportunities**Chair *Fary Khan*

Room 103

3.30pm *Linda Clare*, UK
Awareness in dementia: Implications for rehabilitation

4.15pm *Jürg Kesselring*, Switzerland
Neurorehabilitation in neurodegenerative diseases: Mechanics of learning - lessons from neurorehabilitation

3E Traumatic Brain Injury 2Chair *Jennie Ponsford*

Rooms 101 & 102

3.30pm *Emily Nalder*, Australia
Caregivers experiences during transition from hospital to home following brain injury: A mixed methods study
Abstract no. 153

3.45pm *Jennifer Fleming*, Australia
The effect of environmental factors on community integration following traumatic brain injury
Abstract no. 241

4.00pm *Ettie Ben-Shabat*, Australia
Proprioceptive perception: A behavioural and functional MRI study of its hemispheric dominance
Abstract no. 278

4.15pm *Tamara Ownsworth*, Australia
Depressive symptoms following discharge after traumatic brain injury: Support for a reactive model?
Abstract no. 196

4.30pm *Lucy Knox*, Australia
Exploring tensions associated with supported decision making in adults with severe traumatic brain injury
Abstract no. 245

4.45pm *Pamela Ross*, Australia
Predictors and outcomes of occupational therapy driver assessments and rehabilitation after traumatic brain injury
Abstract no. 356

3F Motor Rehabilitation and Plasticity Across CNS Impairments: Not all training is good (or good enough)Chairs *DeAnna Adkins/Dorothy Kozlowski*

Room 213

DeAnna Adkins, USA
Impaired motor recovery: Consequences of training the "good" and the "bad" limb in rat model of stroke

Dorothy Kozlowski, USA
Neuroplasticity and neurorehabilitation in an animal model of TBI: How can it inform clinical rehabilitation?

David Magnuson, USA
Misdirecting plasticity: Consequences of a Stretching/ROM therapy post-SCI in the rat

Jeffrey Kleim, USA
Dissociating cranial motor from limb motor impairments in an animal model of Parkinson's Disease

Q & A Session with all presenters

3G Towards a Roadmap in Brain Protection and RecoveryChairs *Klaus von Wild/Heinrich Binder*

Rooms 111 & 112

Dafin Muresanu, Romania
Neurobiology and pharmacological support of neurorehabilitation

Volker Hoemberg, Germany
Early neurorehabilitation after stroke: The results of CARS trial

Pieter Vos, Netherlands
The new approach in clinical trials design for brain protection and recovery in TBI: CAPTAIN trial

Q & A Session with all presenters

Academic Partner

THE SOCIETY FOR THE STUDY OF NEUROPROTECTION AND NEUROPLASTICITY
