

Congress Program | Friday 18 May 2012 *continued***5D** Imaging and Plasticity 2Chair *Leeanne Carey*

Room: Plenary 2

- 1.30pm *Stephen Rose*, Australia
New insight into brain injury and plasticity using MRI structural connectivity analyse
- 2.00pm *Maurizio Corbetta*, USA
A functional-anatomical model of neglect and recovery
- 2.30pm *Cathy Steinar*, New Zealand
Predicting potential for recovery: Multimodal assessment of key motor pathways

5E Advances in TBI NeurorehabilitationChair *Nathan Zasler*

Rooms 105 & 106

- 1.30pm *Ian Baguley*, Australia
Paroxysmal sympathetic hyperactivity
- 2.00pm *Jennie Ponsford*, Australia
Challenges in improving long term outcome following TBI
- 2.30pm *Nathan Zasler*, USA
Effort and response bias testing in TBI clinical practice and research: Caveats and controversies

Sponsored by

**5F** Stroke 3Chair *Katerina Sunnerhagen*

Rooms 109 & 110

- 1.30pm *Heidi Janssen*, Australia
The use of an enriched environment post stroke: Translating from bench to bedside
Abstract no.378
- 1.45pm *Assia Jaillard*, France
Could motor cortex activity predict motor stroke recovery? An fMRI study on subacute lacunar stroke *Abstract no.621*
- 2.00pm *Louise Ada*, Australia
Improving walking after stroke: The ambulate trial *Abstract no.183*
- 2.15pm *Jan Lexell*, Sweden
What are the long-term benefits of progressive resistance training in chronic stroke? A 4-year follow up
Abstract no.219
- 2.30pm *Carina U Persson*, Sweden
Responsiveness and change over time in postural control using clinical measurements: Postural stroke study on Gothenburg (postgot) *Abstract no.211*
- 2.45pm *Jennifer White*, Australia
Trajectories of psychological distress: A longitudinal cohort study
Abstract no.269

5G Neuropathic Pain SyndromeChair *Martin Grabois*

Room 103

- Martin Grabois*, USA
- Leonard Li*, Hong Kong
Post CVA Neuropathic Pain
- Martha Imamura*, Brazil
Post SCI Neuropathic Pain
- Witsanu Kumthornip*, Thailand
CRPS
- Panel Discussion with presenters
