

Congress Program | Saturday 19 May 2012 *continued***8D Clinical Trials in Neurorehabilitation:  
Taking Stock and Moving Forward**Chair *Coralie English*

Rooms 109 &amp; 110

**Bruce Dobkin**, USA

Clinical trial designs and how to choose the best design to answer your question

**Audrey Bowen**, UK

Current problems with rehabilitation trial designs

**Janice Eng**, Canada

How to build multi-centre trials

**Julie Bernhardt**, Australia

How to maintain trial enthusiasm over the long haul

**8E Stroke 6**Chair *Natasha Lannin*

Room 213

1.30pm **K Vijayakumar**, IndiaEffects of pneumatic abdominal binder and calf compression versus elastic compression bandaging on orthostatic hypotension in patients with acute stroke: A randomised clinical trial *Abstract no.379*1.45pm **Oliver Stoller**, SwitzerlandEffects of cardiovascular exercise early after stroke: Systematic review and meta-analysis *Abstract no.60*2.00pm **Wolfgang Deppe**, GermanyConstraint-induced movement therapy (CIMT) compared with intensive bimanual training hemiplegic children - what is more effective? A randomised controlled trial *Abstract no.616*2.15pm **Penelope McNulty**, AustraliaWii-based movement therapy benefits patients with very low function post-stroke *Abstract no.371*2.30pm **Mayowa Owolabi**, NigeriaImpact of stroke on health-related quality of life in diverse cultures: The Berlin-Ibadan Multi center International Study *Abstract no.213*2.45pm **Bernard Elsner**, GermanyTranscranial direct current stimulation (TDCS) for improving upper limb (UL) and lower limb (LL) motor function after stroke: A systematic Cochrane Review *Abstract no.188***8F Traumatic Brain Injury 5**Chair *Jennie Ponsford*

Rooms 111 &amp; 112

1.30pm **Ro Packer**, AustraliaThe Incidence of Benign Paroxysmal Positional Vertigo (BPPV) in patients admitted to the acquired brain injury unit *Abstract no.16*1.45pm **Lars Kammersgaard**, DenmarkHydrocephalus following severe traumatic brain injury: Incidence, relation to functional recovery, and rehabilitation stay hemiplegic children - what is more effective? A randomised controlled trial *Abstract no.136*2.00pm **Ben Turner**, AustraliaFrom hospital to home: A new conceptual framework for transition based service delivery following acquired brain injury *Abstract no.417*2.15pm **Mark Linden**, UKEducational professionals' understanding of childhood brain injury *Abstract no.566*2.30pm **Q & A Session** with all presenters
